AGENDA:

- **TOUR WASTEWATER TREATMENT PLANT**
- **REVIEW COUNCIL AGENDA** *(if time allows)*
- **REVIEW NEWSLETTERS** *(if time allows)*

TOUR WASTEWATER TREATMENT PLANT

We have spent some time over the past two years discussing the wastewater treatment plant, the permitting process for the plant, and the possible improvements that will be needed to not only address an aging plant but also to meet Department of Natural Resources treatment requirements.

The Council met with Pat Young with HDR, lead engineering firm working on a plan for our wastewater treatment plant. Mr. Young gave the Council an update on where things stood with the development of our facility plan for wastewater plant improvements outlining the considerations and options that were considered in this development process.

Public Works Director John Buckwalter and Wastewater Plant Supervisor Duane Covington will be in attendance to walk you through the treatment process and the areas where improvements are needed.

Recommendation: The Council will be making major decisions regarding the future of this plant in the near future, please ask questions. It is sometimes noisy and hard to hear, please let the presenters know if you are having trouble hearing the information that they are presenting.
